

KEYBOARD TRAYVERSION 1.3

Last updated: 31-07-2023

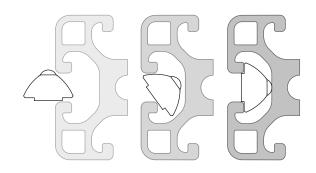

BEFORE YOU START:

Thank you for purchasing this Sim-Lab product! On the following pages, you will find detailed instructions on assembly. This requires only a set of simple tools and some of your time. Please check the bill of materials before starting (page 8) and make sure all the parts are delivered.

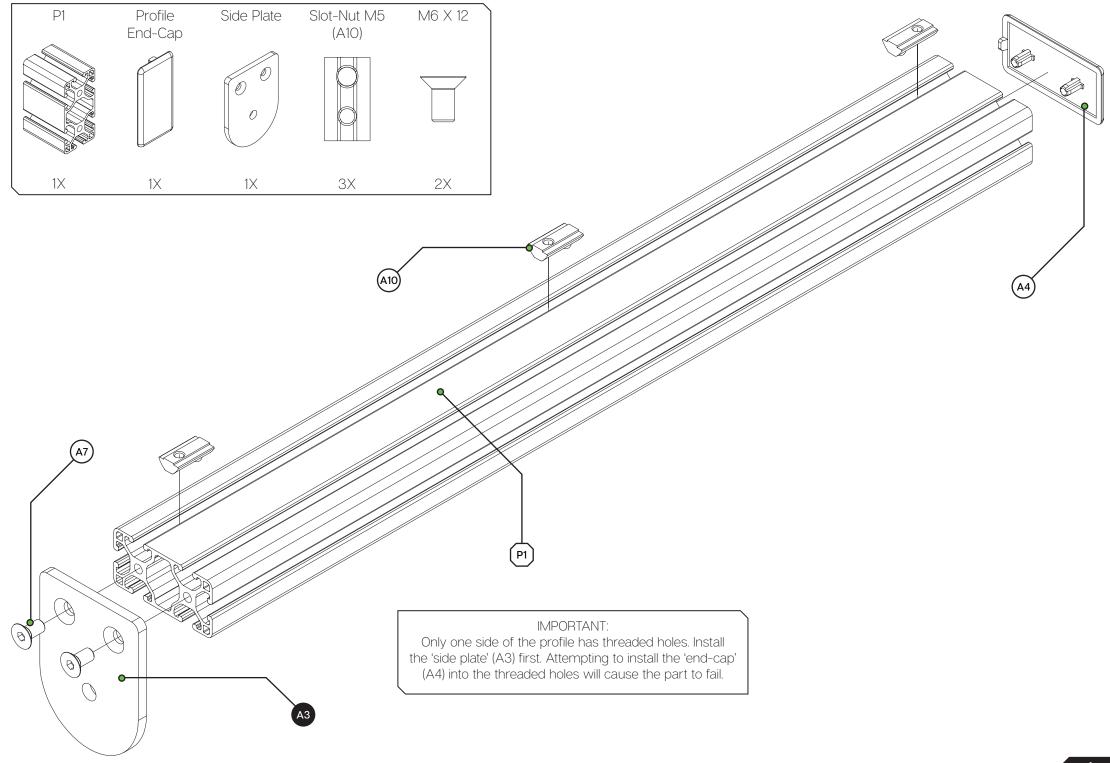

Please take note of the fact that this part can be mounted on both the left or right side of your rig. Instructions given assume the keyboard tray will be mounted on the right.

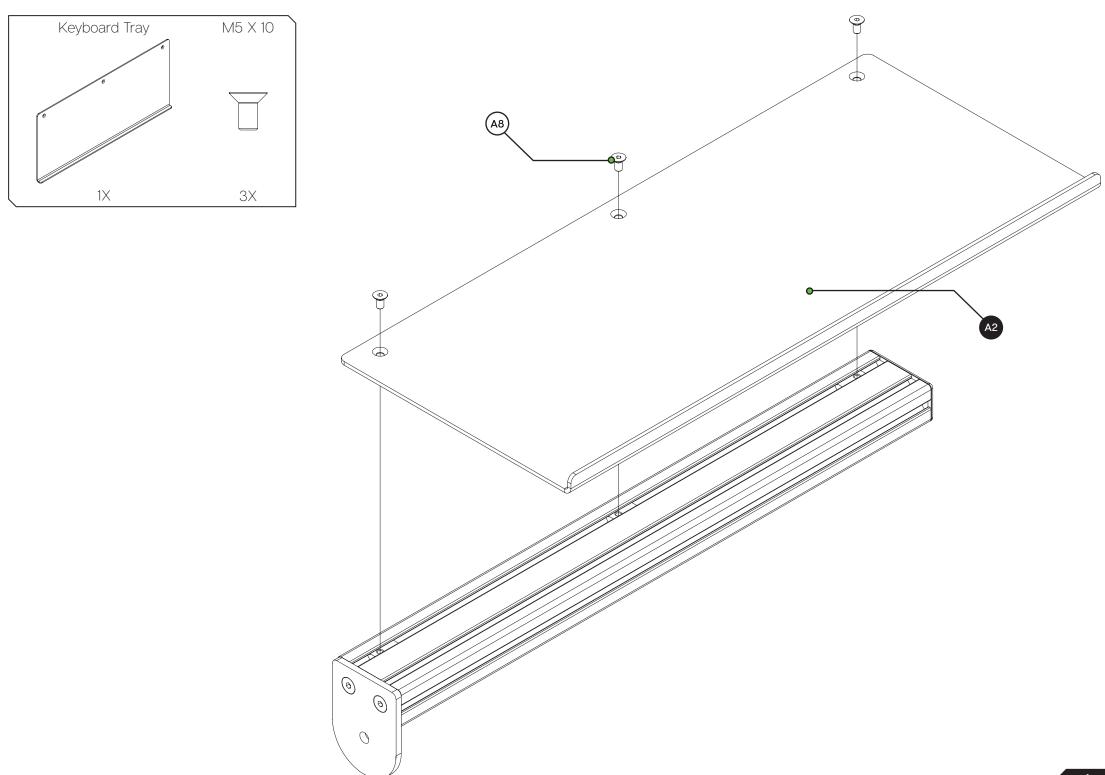

Inserting Slot-Nuts:

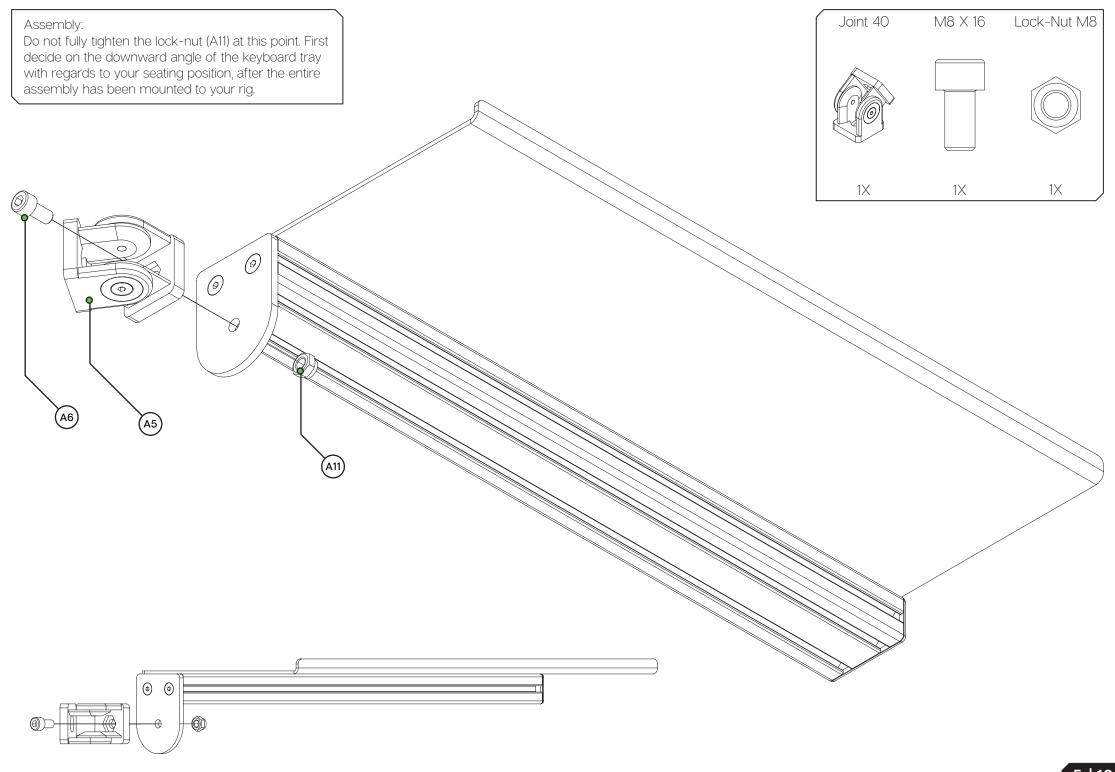

You got excited, finished the build, put the caps on, but forgot to install one element. Do not worry. It happens to everyone. In this diagram, you can see how to insert a Slot-Nut directly into the slot from the side. You can also use one of your smaller Hex wrenches to help wiggle the Slot-Nut in place.

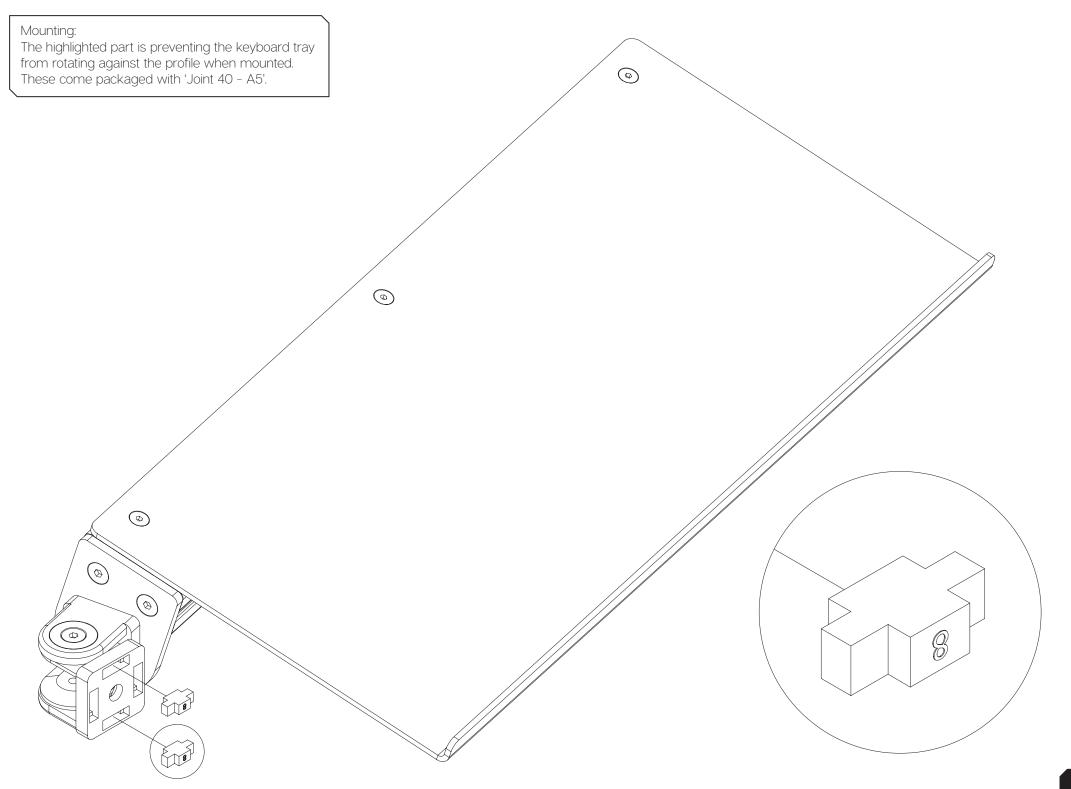

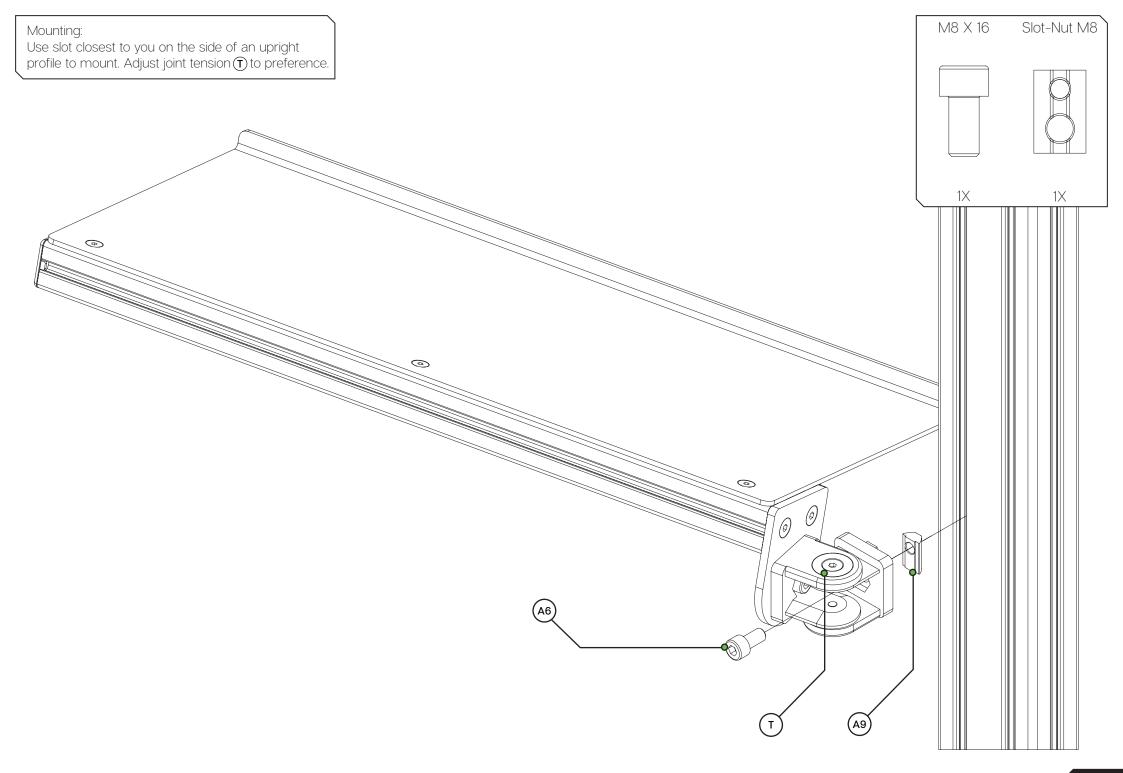

PROFILE KIT			
#	Part	QTY	Note
P1	30X60 Length=500mm	1	Only one end of the profile has threaded holes.
